

✓ Licence Check

What is it?

Changes to legislation mean that businesses are **more exposed than ever to risks** from the behaviour of their drivers. Our online service reduces that risk by checking your drivers' licences against **DVLA licence** data automatically.

How will it help your business?

Licence Check helps you comply with Health and Safety guidelines regarding driver licence checking. Once your drivers are set up, the **process is automatic** so you don't forget. This not only reduces the risks to your business but also reduces the administrative burden of checking licences manually.

Why Neva Consultants?

- Licence Check provides **comprehensive and up-to-date data** on your drivers, directly from DVLA data, which protects you against fraud.
- You can choose the frequency of the checks and carry these out more often for drivers with driving convictions or a poor accident record.
- Neva Consultants can provide help and advice in setting up your drivers for **automated and secure driver licence checking**.

Corporate manslaughter law now makes it easier to prosecute companies responsible for fatal accidents. With an **unlimited maximum penalty** for a conviction, no company can take Duty of Care seriously enough.

Neva Consultants Licence Check addresses this issue by offering you a **convenient and comprehensive online portal** which allows you to check:

- Whether the driver is entitled to drive a vehicle
- Whether the driver is currently banned
- That the driver is entitled to drive the category of vehicle they are operating
- Whether the driver has any undisclosed points or endorsements on their licence
- That the driver's recorded address matches

All you need to do is register your drivers' details with us and nominate how often you would like our system to check their records.

We charge a flat fee every time our system checks an individual driver's records. You can increase or decrease the frequency depending on a driver's status.
