

# Fuel Management

## What is it?

Fuel Management gives your business increased control over the way your drivers buy and use fuel, streamlining the process and reducing the cost of managing your fleet. Utilising fuel cards is a convenient alternative to 'pay-and-reclaim' and can help you improve fuel efficiency, reduce administration, lower overall mileage and improve VAT recovery.

## How will it help your business?

After vehicle depreciation, fuel costs are likely to be the second biggest expense to your fleet. When you take into account the high price of fuel, it is critical to managing your budget.

Fuel Management puts you in control of the fuel used by your drivers. It reduces admin-related costs and makes it easier to reduce excessive business mileage claims and fraud.

## What are the benefits of fuel cards?

- Fuel cards make it easier to claim back VAT with an itemised, HMRC approved, VAT invoice. There is no longer a need to keep receipts or log transactions manually.
- A single invoice shows exactly what has been purchased, when and where it was purchased including the type of fuel and the cost of each transaction.
- Fuel cards allow you to lock down your employees purchase options, giving you greater control over what your drivers buy and help keep your costs down.
- Reduces your administrative burden. You will no longer have to spend hours pouring over receipts and adding expense claims together.
- Fuel cards are designed to make life easier for everyone involved, and that includes your employees, making sure they don't have to spend hours filing their expenses each month.

## Why use a fuel card from Neva Consultants?

- Accepted at over 7,700 fuel sites throughout the UK, with discounted diesel at over 1,800 sites.
- Uses chip technology to limit fraudulent card usage.
- Suitable for all fleet sizes.
- Smartphone app allows users to search for the nearest petrol station.
- Large and convenient fuelling network minimises deviation off route.
- All transactions are sent directly from the fuel stations so you don't need to worry about receipts.
- Detailed reporting suite provides further insight into your fuel management.
- Access your transaction data any time you want and schedule reports to save you time.
- Useful management information allows you to improve driver fuel consumption.
