

# e-Fleet Mobile

## What is it?

e-Fleet Mobile is an award-winning web app **for both drivers and fleet managers** that works on modern smartphone devices.

## How will it help your business?

e-Fleet Mobile **makes life simple for drivers and provides better control for fleet managers**. The app allows drivers to record their mileage, book a service and access **all of their support numbers in one place**; while for fleet managers, there's predictive mileage contract control and vehicle inspection reporting.

## Why Neva Consultants?

- e-Fleet Mobile offers drivers **enhanced functionality** and **remote access** to the key services needed to ensure their vehicles continue to operate effectively.
- The app integrates with e-Fleet Manager, our online fleet management system, ensuring **fleet managers are in control of their fleet at all times** through the effective recording of vital driving information.
- e-Fleet Mobile was named 'Best App' by BusinessCar magazine as part of their hotly contested Fleet Technology Awards.

## Features and benefits

- **Driver mileage input**  
Drivers can use e-Fleet Mobile to easily update their mileage directly to e-Fleet Manager. Provides improved expense management, more accurate mileage recording and faster expense claims and payment. It also allows fleet managers to closely monitor accumulating mileages and produce predictive mileage reports identifying vehicles in danger of exceeding contract mileages.
- **Business Trips**  
Drivers can log their business trips with automatic calculation of journey distance. Fleet managers can set tolerances for over mileage requiring justification for longer journeys. Reduce fuel costs through improved mileage management and makes mileage input easier as business mileage is automatically calculated based on trips logged.
- **Driver support numbers**  
Drivers simply enter their registration number to access all their main contact numbers and access points, tailored to each driver, from breakdown recovery to tyre replacement.
- **Service booking**  
Drivers can easily book a service from within the app itself with driver and vehicle data pre-populated for ease of use.
- **Vehicle inspection reporting**  
Drivers can log a in-depth vehicle inspection allowing fleet managers to monitor the condition of their fleet. Provides improved and auditable health and safety compliance.
- **Driver documents**  
Ensure your drivers always have access to the latest version of important documentation such as your fleet policy.
- **Vehicle Ordering**  
Drivers can compare vehicles in their grade list to check specification, benefit in kind, whole life cost, trade up and down grades (if permitted) and ordered directly from the app.
